

Open Call for a Postdoctoral Researcher
Viral Host-Pathogen Interactions and Cell Biology
Instituto Gulbenkian de Ciência, Oeiras, Portugal

The Instituto Gulbenkian de Ciência – IGC (<https://gulbenkian.pt/ciencia/>) is inviting applications for a postdoctoral researcher to join the newly formed Henriques (Optical Cell Biology) laboratory as part of a highly-collaborative and interdisciplinary team developing novel super-resolution microscopy, machine learning and automation technologies and their application to tackle cellular infection.

The IGC is an international institute located in a seaside town close to Lisbon, Portugal, and integrated in a multidisciplinary campus. It is a world-leading biology research center, providing modern facilities and an exciting research environment. IGC strategy also includes investment in outstanding central resources, participation and development of national and international networks and activities, as well as in public dissemination, outreach activities as well as promotion of science in the developing world (see more and quantitative info in <https://gulbenkian.pt/ciencia/homepage/igc/facts-and-figures/>). The IGC has a vibrant environment, composed by approximately 400 people, 300 scientists, amongst which one third are foreigners from over 40 nationalities.

ROLE:

The postdoctoral researcher will study intracellular viral infection by employing prototype and cutting-edge optical tools, to both image and optically manipulate samples. The post-holder will be hosted by the Henriques lab at IGC, with an opportunity of short visits to the large network of laboratory collaborators.

REQUIREMENTS:

Applicants should have a BSc and PhD (taken in the last 3 years) in a relevant field and extensive research experience in cell biology, virology, host-pathogen interaction and imaging. Experience in HIV-1, super-resolution microscopy, structural biology, biophysics and computational modelling will be valued. Good communication skills, including a good level of spoken English to enable a good communication and work in an international setting, are necessary. High commitment and a collaborative attitude are needed for this job.

WE OFFER:

- Fellowship annual contract starting September/October 2020, with the possibility of renewal.
- Annual stipend according to the candidate's level of expertise
- Continuous training.
- Career development perspectives.
- Dynamic working atmosphere

APPLICATION PROCESS:

Interested candidates should send to the email rjhenriques@igc.gulbenkian.pt with the subject '*Viral Host-Pathogen Interactions*' containing one PDF file with Letter of Motivation (2 page max) and a detailed *Curriculum Vitae*.

The deadline for the applications submission is August 31st 2020 or until the post is filled.

SELECTION PROCEDURE:

After a pre-analysis of *Curriculum Vitae* and letter of motivation the selected candidates will be contacted for an interview.

NON- DISCRIMINATION AND EQUAL ACCESS POLICY:

The Instituto Gulbenkian de Ciencia of the Calouste Gulbenkian Foundation actively promotes a non-discrimination and equal access policy, wherefore no candidate can be privileged, benefitted, impaired or deprived of any rights whatsoever, or be exempt of any duties based on ancestry, age, sex, sexual preference, marital status, family and economic conditions, education, origin or social conditions, genetic heritage, reduced work capacity, disability, chronic illness, nationality, ethnic origin or race, origin territory, language, religion, political or ideological convictions and union membership.
